A 55 year old woman, presented to our hospital with a one year history of coughing and left chest pain. A chest CT-scan showed mediastinal, pleural and pulmonary cystic lesions evoking hydatidosis. Surgical exploration found a cystic lesion of the aorta-pulmonary window.

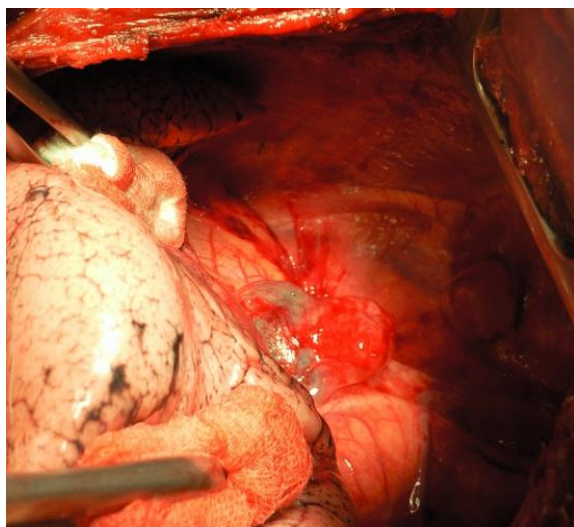

Figure 1: Peroperative view showing a cystic lesion of the aorta-pulmonary window

This is a hydatid cyst of a mediastinum lymph node. No similar case report is found in literature.

Figure 2: hydatid cyst of lymph node

Keywords: Hydatidosis; Mediastinum; Lymph node; Surgery.

CONFLICT OF INTEREST : The authors had no conflict of interest to declare.
